

Outlineoffungi.org - Note 14, *Agriosomyces*

Agriosomyces Hanafy et al.

Hanafy et al. (2020) isolated and characterized 65 anaerobic gut fungal strains from several herbivorous mammal species in the USA through morphological and molecular characterization. To assess phylogenetic relationships, they used ITS1 and 28S rDNA regions. As a result, they introduced seven novel genera, namely *Agriosomyces*, *Aklioshbomyces*, *Capellomyces*, *Ghazallomyces*, *Joblinomyces*, *Khoyollomyces*, and *Tahromyces* in Neocallimastigaceae (Hanafy et al. 2020) (M. Erdoğdu).
