[Hippopotamyces](#) Crous

[Hippopotamyces](#) was introduced by [Crous et al. \(2019d\)](#) to accommodate *H. phragmitis* collected from leaves of *Phragmites australis*. It has a septoria-like morphology ([Quaedvlieg et al. 2013](#), [Verkley et al. 2013](#)), but is phylogenetically distinct, and represents a new genus in the *Mycosphaerellaceae* ([Videira et al. 2017](#)) (M. Erdoğan).
