

Outlineoffungi.org - Note 290, *Naevia*

Naevia Fr.

Thiyagaraja et al. (2020) resurrected this genus of *Arthoniaceae* from the synonymy with *Arthonia* for a lineage of non-lichenized, saprotrophic arthonioid fungi using molecular analyses of a combined data set of nuLSU, mtSSU and *rpb2* sequence data (D. Ertz & V. Thiyagaraja).
