

Outlineoffungi.org - Note 509, [Thyrostroma](#)

[Thyrostroma](#) Höhn.

Höhnel (1911) introduced [Thyrostroma](#) with *T. compactum* as the type species. [Thyrostroma](#) comprises 24 morphological species but only 12 species have molecular data. [Phillips et al. \(2008\)](#) regarded [Thyrostroma](#) as the asexual morph of [Dothidotthia](#). [Crous et al. \(2016a\)](#), [Marin-Felix et al. \(2017\)](#) and [Senwana et al. \(2019b\)](#) showed that [Thyrostroma](#) and [Dothidotthia](#) are not congeneric. [Senwana et al. \(2019b\)](#) added eight other species based on morphological and phylogenetic evidence and [Pem et al. \(2019c\)](#) added one new species *T. ephedricola* and provided a new combination *T. jaczewskii*. [Jayawardena et al. \(2020\)](#) discuss the phytopathogenic species of this genus (D. Pem).
